Tailored, Customizable, Cost-effective Pump Management for your irrigation system.

Be In CONTROL Of Your SYSTEM

The PumpHouse PRO utilizes Variable Frequencies Drives (VFDs) to regulate water pressure and provides precision pump control, often helping reduce our customers' energy costs by up to 25%. Upgrading your system to the PumpHouse PRO will improve operations for years to come.

- Remote connectivity to smart device
- 24/7 system status, alarms (no annual contract or fees)
- Fully programmable touchscreen (HMI)
- Single or multiple pump systems
- Retrofit/add to existing pump station
- Crucial data collection (PSI, flow, faults, pump starts/stops, run-time hours)
- Thousands less than pump stations

Over 35 years of experience, contact us today for a free assessment of your system
